

With an experience of three generations **T.O.P. QUALITY** produces **industrial precision metal components**, obtained from **shearing off, stamping, bending, threading, assembling and welding of metal strips and wires**.

We use Bihler and Bruderer technology and we can supply cut and folded parts and provide them as tape or bulk goods.

The pieces may be delivered raw or after heat- or galvanic treatments:

- **hardening/tempering**
- **galvanizing/dehydrogenation**
- **nickel, copper, tin, silver and gold plating**

Selective galvanic treatments can be performed also on products already cut.

Our products include: cut jacket M3/M3,5/M4/M5, Brass jacket with pin and bronze plates M2, 5/M2, 6, contacts with silver plates, terminals, socket cells, Schuko plug, fasteners, bushings, springs in strips, connecting rods for hinges, wire jumpers, platelets double thread, connectors, special in-band and small parts in general.

T.O.P. QUALITY is able to satisfy every application of construction of moulds realized in steel or in hard metal. Thanks to more than 40 years of experience, the planning and the construction of the moulds are constantly followed by T.O.P. QUALITY up to the approval of the samplings.

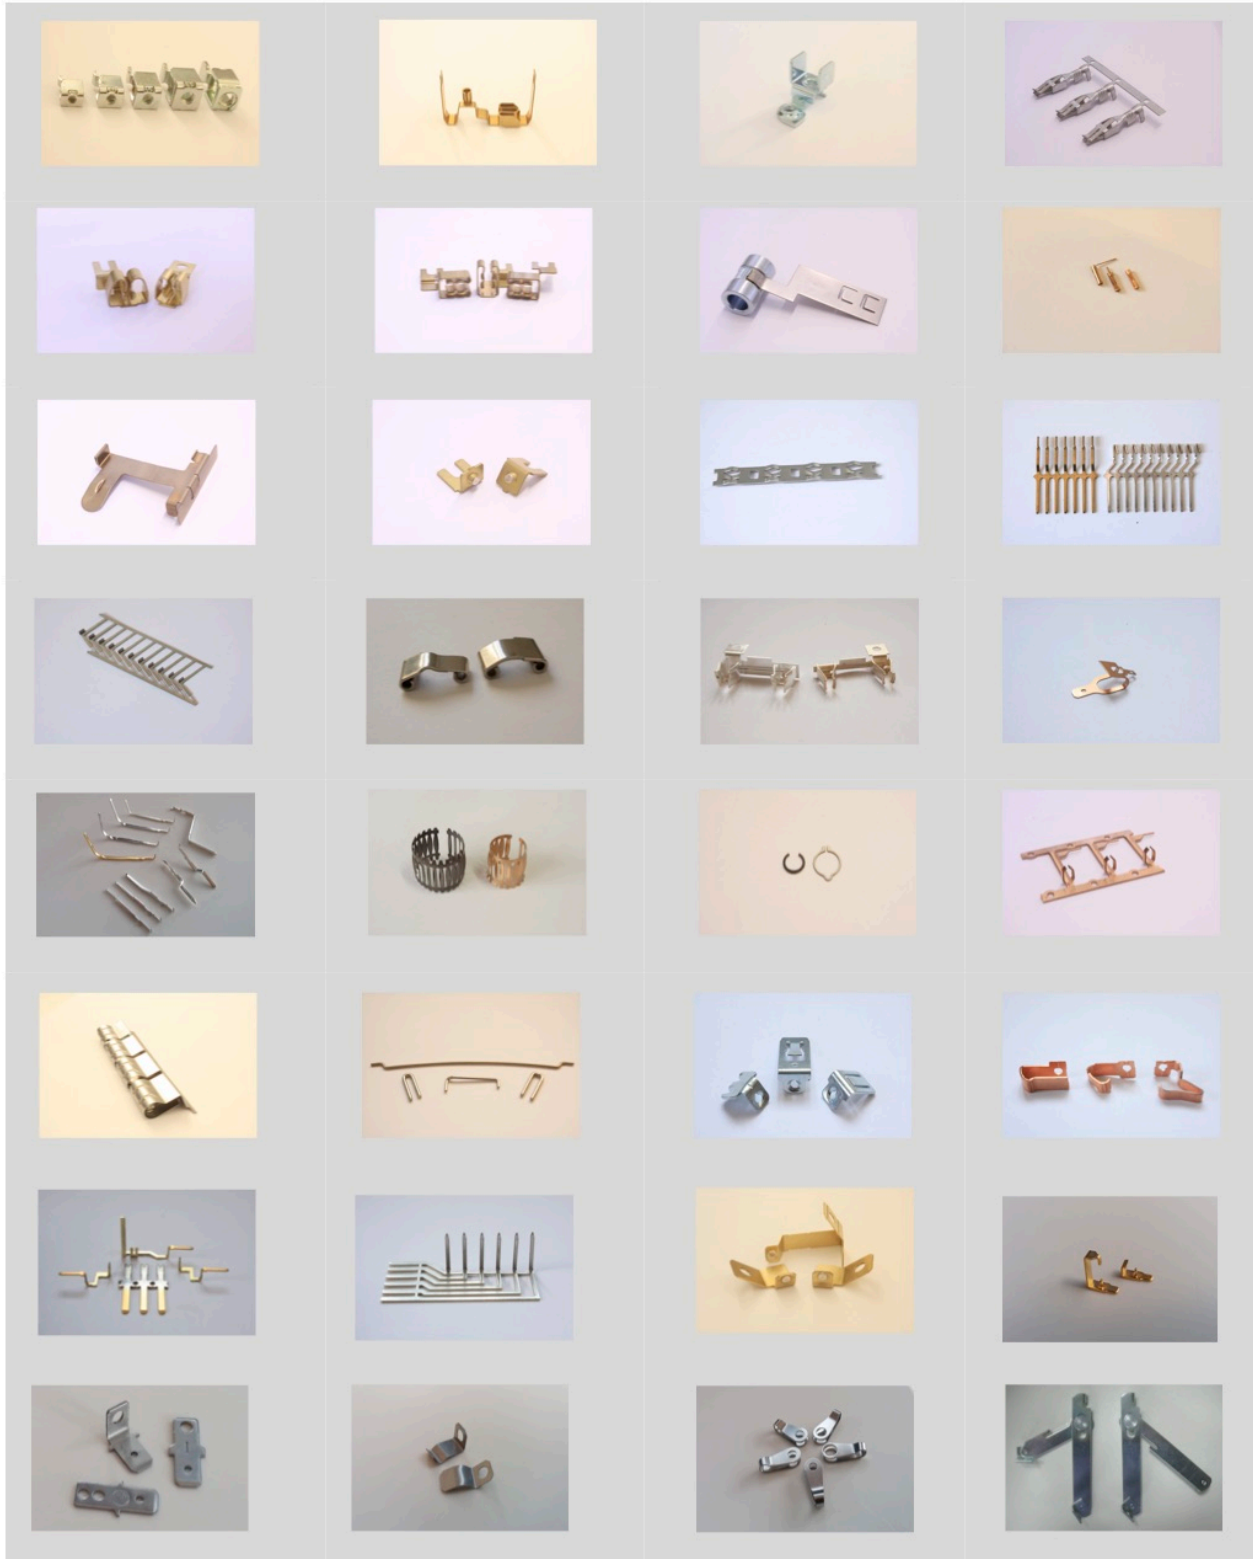

The company has acquired **ISO 9001:2008 certification** and is supported by an efficient department for quality control with modern tools and qualified staff. The quality represents the link of all of our values!

The trust that the major companies in the **electrical, electronic and automotive industries** give us is a further indication of the reliability of our company and guarantee for a future collaboration.

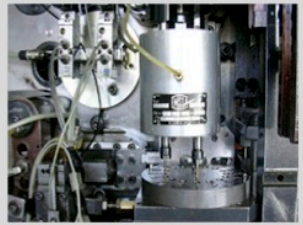

For any further information, we kindly ask you to visit our web site www.top-quality.it

Our products:

here following you can find a short presentation of our production, which stands out for the "quality" we pursue in each working phase, from production process to end-product.

Here our machineries:

Bihler GSE 4 tapping unit for thread rolling	Bihler B5000 welding equipment for resistance welding or electro-welded silver contacts
 	 

Presses

- Nr. 2 Bihler RM 40 bending machines
- Bihler MC 42 bending machine
- Nr. 2 Bihler GRM 50 bending machine
- Bruderer BSTA 60 H fast bending machine

Finishing Machines and Equipment for presses

- Bihler B 5000 welding machine
- Bihler Clamp for resistance welding
- Bihler Clamp for electro-welded silver contacts
- Nr. 2 Bihler GSE 4tapping machines
- Vivaldi sifter
- Roll Wasch vibrofinish machine

Heat Treatment

- Nr. 2 ovens for heat treatment

Machine Tools Maintenance for Equipment Department

- Abac Formula I 11 compressor
- Rotair RVC 20/10 compressor
- Colchester Bantam BS 3500 Lathe
- Bridgeport-J fast head milling machine
- Bergamini Bermi 500 grinding machine

Quality Department

- Leitz 300 profile projector
- Wild M3 B microscope
- Wolpert hardness tester
- Sylvac 100 measuring instruments with electronic probe for statistical controls
- Measuring machine with 3D OGP camera
